EXPERIENCE

Giddy, Austin — Frontend Engineer

Feb 2022 - PRESENT

Led the successful creation and implementation of two e-commerce sites using Bigcommerce's platform, resulting in the website with the highest revenue impact.

Engineered a custom internal tool for monitoring customer reviews, enabling marketers to proactively assess customer feedback.

Mentored junior engineers to help them improve their skills in website development.

McLennan Community College, Waco — Fullstack Engineer

May 2019 - Feb 2022

Developed and deployed Highschool Pathways for McLennan Community College - Designed and developed the dual credit website, Highschool Pathways, using C#, ASP.NET, Javascript, HTML, and CSS.

Maintained and updated Continuing Education website for McLennan Community College - Implemented new features and maintained the codebase with updates as needed.

Migrated processes and views from one site to another in MVC format for McLennan Community College - Transferred processes and pages from a retiring website to a new MVC website, creating new views and multiple API endpoints using C#.

Responsible for developing web apps for student success in the Higher Education / Academia market.
