Reggie Mitchell

Frontend Engineer

Austin, TX | (254)715-1001 | reggie.mitchell.j@gmail.com

Experience

Frontend Engineer at Giddy – February 2022

Fullstack Engineer at McLennan Community College - May 2019 – February 2022

Web Development Intern at Four Columns Waco - August - October 2018

Accomplishments

- Deployed two e-commerce sites using Bigcommerce's platform – Led the successful creation and implementation of the website with the highest revenue impact.

- Created custom internal tool for monitoring customer reviews - Engineered an in-house tool enabling marketers to proactively monitor and assess customer reviews.

- Developed and deployed Highschool Pathways for McLennan Community College - I was a key member in designing and developing the dual credit website, Highschool Pathways, for Mclennan Community College. My primary languages used in the development of this website were C# and ASP.NET. I also utilized Javascript, HTML, & CSS.

- Maintained and updated Coninuing Education website for McLennan Community College - I was responsible for implementing new features and maintaining the codebase with updates as needed.

- Migrated processes and views from one site to another in MVC format for McLennan Community College - I was in charge of taking processes and pages from a website that was being retired and reimplementing them in a new website that uses MVC by creating creating new views and multiple API endpoints using C#.
